Summary

Full-stack developer specializing in Next.js and Node.js, with strong foundations in data structures, algorithms, and computer science fundamentals. Experienced in building scalable, reliable web applications with clean architecture, efficient data flow, and performance-focused design.

Education

Bachelor of Technology in Computer Science and Engineering

CGPA: 9.41 / 10

Institute of Engineering and Management

09/2021 - 07/2025

- **Relevant Coursework:** Data Structures and Algorithms, Database Management System, Operating System, Object Oriented Programming

Experience

Tata Consultancy Services Limited

12/2025 - Present

System Engineer

Noida

- Automated user onboarding using JavaScript, reducing manual effort from 1 minute per user to a single-click bulk process.
- Identified and fixed a system performance issue in QA by debugging and resolving the root cause of degraded performance.
- Built automation-driven solutions within enterprise supply chain systems, improving operational efficiency and reducing repetitive manual work.

Projects

Campus Coder | Next.js, Node.js, React Modules, Firebase

[CampusCoder](#)

- Designed and developed a unique web-based IDE, integrating collaborative coding features and leveraging diverse **design patterns** to enhance scalability and maintainability.
- Optimized database design by separating problem metadata from full problem details into two collections, reducing payload size by **70%** and improving API response time for multiple endpoints.
- Designed and integrated **transaction based operations** to synchronize concurrent tasks, ensuring data integrity and reliability across collections.

Sorting Visualizer | Next.js, Tailwind CSS

sorting-visualiser-topaz.vercel.app

- Built an interactive sorting visualizer to help users understand algorithm efficiency through live visualizations.
- Implemented multiple sorting algorithms using **strategy design pattern** for flexible switching among algorithms.
- Achieved an SEO performance score of 90+, improving site visibility.

Technical Skills

Programming Languages: Java, C, C++, JavaScript

Backend: Node.js, Express.js

Frontend: Next.js, React.js, HTML, CSS, Tailwind CSS

Database: MySQL, MongoDB, Firebase

Advance Backend: Redis Pub/Sub, Kafka

Achievements

- Knight level coder on LeetCode. Solved over **1900+** problems, with a peak rating of **2075** (top 2% globally).
- Received NPTEL elite with silver certification in "[An Introduction to Programming through C++, IIT Bombay](#)", with 86% marks.
- Achieved a global rank of **397** in LeetCode "Biweekly contest 144".
